

TABLE OF CONTENTS

PART I: IC END-USE APPLICATION DATABASE

Section 1. IC End-Use Database Introduction	1-1
Background	1-1
Definitions.....	1-1
Survey Participants	1-2
Rounding Error	1-2
Other Considerations.....	1-3
IC Industry Cycles	1-3
The Aftermath of Global Recessions.....	1-4
Worldwide “Top-Down” Market Forecast	1-5
Section 2. IC End-Use by Electronic System Type	2-1
Introduction	2-1
IC Market Overview	2-1
IC Usage by System Type.....	2-4
Government/Military IC Usage	2-4
Communications IC Usage	2-6
Industrial IC Usage	2-9
Computer IC Usage.....	2-13
Automotive IC Usage	2-15
Consumer IC Usage	2-19
Total IC Usage by System Type	2-22
Section 3. IC End-Use by Device Type	3-1
Introduction	3-1
Analog.....	3-1
MOS Microcomponents	3-5
MOS Microprocessors (MPUs)	3-7
MOS Microcontrollers (MCUs).....	3-9
Digital Signal Processors (DSPs).....	3-11

TABLE OF CONTENTS

Total Microcomponents	3-11
MOS Logic/MPR (Microperipherals)	3-14
MOS Memory	3-18
Total Integrated Circuits (ICs)	3-27
Section 4. IC End-Use by Geographic Region	4-1
Introduction	4-1
Electronic System IC Usage by Region	4-1
Total IC Usage by Region	4-1
Regional Government/Military IC Usage	4-2
Regional Communications IC Usage	4-3
Regional Industrial IC Usage	4-4
Regional Computer IC Usage	4-5
Regional Automotive IC Usage	4-6
Regional Consumer IC Usage	4-7
Americas IC Usage by System Type	4-8
European IC Usage by System Type	4-11
Japanese IC Usage by System Type	4-14
Asia-Pacific IC Usage by System Type	4-18

PART II: ANALYSES OF END-USE APPLICATIONS

Section 1. Automotive Electronics	1-1
Introduction	1-1
Worldwide Automotive IC Market	1-2
Analog ICs	1-8
Microcontrollers	1-9
Digital Signal Processors	1-11
Sensors	1-14
Emerging Automotive Systems	1-18
Safety First	1-20
Active Safety—Electronic Stability Control	1-21
Proximity Control/Adaptive Cruise Control	1-21
Smart Airbag Systems	1-23
Monitoring Driving Behavior	1-24

Infotainment	1-25
Bluetooth-Enabled Vehicles	1-25
Telematics/Navigation	1-26
Replacing Mechanical Systems with Electronics	1-27
Electronic Steering	1-28
Braking.....	1-29
Active Suspension.....	1-29
42V Power System Efforts.....	1-30
Data Buses: CAN, MOST, LIN, and FlexRay	1-31
Electric and Hybrid Electric Vehicles.....	1-33
Chevrolet Volt Hybrid	1-36
Summary	1-38
Section 2. Cellphones and Smartphones	2-1
Communications System Overview	2-1
Electronic Systems Market Makeup	2-1
Wireless Communications Systems Market	2-2
Cellular Basestation Market Overview	2-5
Communications IC Market Overview	2-7
Cellular Technology Background	2-12
2.5G Cellular.....	2-15
Cellular Service Subscriber Forecast	2-16
Overview.....	2-16
Regional Subscriber Base Forecast.....	2-17
China’s Increasing Role.....	2-21
Approaching Saturation	2-23
Cellular Subscriber Base Standards	2-25
Cellular Phone Handset Market Trends	2-27
Leading Supplier Rankings.....	2-27
Total Cellular Handset Shipment Forecast	2-28
Replacement Factors	2-30
Cellular Handset Shipments by Type	2-33
Smartphone Cellular Handsets.....	2-36
Smartphone Characteristics	2-37
Smartphone Battle Intensifies.....	2-39
Apple’s iPhone Game-Changer	2-40
Android-Operating Phones Roll In.....	2-43

TABLE OF CONTENTS

Pressure Grows on RIM’s BlackBerry, Nokia, and Others	2-46
Cellular Handset Market Analysis	2-47
Handset Average Selling Prices.....	2-47
Camera Phones.....	2-51
Mobile-TV Phones.....	2-54
IC Content in Cellular Handsets	2-60
Leading Cellular Handset IC Suppliers	2-68
Third Generation (3G) Cellular.....	2-75
Overview.....	2-75
China’s TD-SCDMA 3G Standard	2-81
4G Cellular.....	2-83
Section 3. Digital Cameras	3-1
Introduction	3-1
Digital Camera Replacement Cycles	3-4
Basics of Operation.....	3-10
Camera Resolution Trends.....	3-11
CCD and CMOS Image Sensors.....	3-17
CMOS Imager Advancements	3-21
CCD Improvements	3-24
Digital Camera Cost Breakdown	3-26
ICs Inside Cameras	3-27
Memory Card Storage Options	3-30
CompactFlash	3-30
Secure Digital/MultiMediaCard.....	3-31
xD-Picture Card (xD).....	3-32
Sony Memory Stick (MS).....	3-32
Camera and Image Processors	3-33
Dual-Use “Hybrid” Still/Video Cameras	3-36
Section 4. Digital Television	4-1
Introduction.....	4-1
Digital Television—Background	4-1
Strong Demand for Flat Screens	4-4
LCD	4-5
LCD Screens Get Bigger, Thinner.....	4-5
Plasma Displays.....	4-8

OLED-TV	4-9
DTV Market Forecast	4-11
Semiconductor Market for DTVs	4-12
Big Applications for Digital TV	4-13
An Internet Battleground?.....	4-14
3D TV	4-16
Big Hopes for Mobile TV	4-17
Regional Standards	4-18
ICs for Mobile TV	4-20
Set-Top Boxes.....	4-21
Set-Top Box Market Forecast.....	4-21
Cable Cards and Integrated Digital TV	4-22
DVD and Video Delivery	4-23
Blu-ray's Uncertain Future?	4-24
DVD Player ICs	4-25
Market Forecast.....	4-27
Section 5. MP3 and Personal Media Players	5-1
Introduction	5-1
MP3 Players	5-1
MP3 Player ICs	5-2
Compression Algorithms	5-4
Solid State or Disk Drive	5-6
iPod Phenomenon	5-7
Personal Media Players	5-10
Section 6. RFID and Smartcards	6-1
Introduction	6-1
How RFID Works	6-1
Tags.....	6-2
Readers.....	6-4
Frequencies	6-5
Middleware	6-5
Application Software	6-6
Lowering Costs	6-7
The Drive to Five-Cent Tags	6-7

TABLE OF CONTENTS

Limitations	6-10
Standards.....	6-10
Interference	6-11
Roadmap Implementation.....	6-12
Skilled Labor.....	6-12
RFID Market Forecast	6-12
Applications	6-16
Retail	6-17
Pharmaceuticals and Healthcare	6-18
Other Applications	6-21
Smartcards.....	6-22
IC Technology	6-24
Smartcard Market Forecast	6-25
Section 7. Video Game Consoles.....	7-1
Introduction	7-1
Different Consoles, Different Strategies	7-2
Nintendo	7-3
Nintendo Wii.....	7-3
Nintendo DSi	7-6
Sony	7-7
PlayStation 3	7-7
PlayStation 2	7-10
PlayStation Portable (PSP)	7-10
Microsoft Xbox 360.....	7-11
Xbox 360 Processors.....	7-12
Video Game Console Market.....	7-14
Section 8. Personal Computers	8-1
Introduction	8-1
PC Market Overview	8-2
PC Market Forecast.....	8-5
PC System and Chip Trends	8-14
Microprocessors.....	8-18
MPUs for Cheaper, Smaller Notebooks	8-34
System Chipsets	8-36
Major Changes in Chipsets.....	8-39

Faster Peripheral Interfaces.....	8-42
PCI Express Evolutions	8-42
Disk-Drive I/O and USB Changes.....	8-43
PC Memory	8-45
Flash’s Growing Presence in PCs.....	8-49
Solid-State Drives	8-50
Hybrid Flash/Hard-Disk Drives.....	8-52
DDR2 vs. DDR3 SDRAMs and Beyond.....	8-53
Graphics	8-57
Section 9. Handheld Computing and Navigation.....	9-1
Evolution of “Pocket Computing”	9-1
Today’s Evolving Handheld Market Forecast	9-4
The Rise and Fall of PDAs	9-9
E-Book Readers	9-13
Steady Improvements in e-Reader Hardware	9-19
Mobile Internet Devices (MIDs).....	9-23
Personal Navigation Devices (PNDs).....	9-29
Chips for Handheld Computing Systems	9-36
Memory Trends.....	9-47
Section 10. Wireless Networks	10-1
Introduction	10-1
Wireless Local-Area Networks (WLANs) Described	10-1
Wireless Personal-Area Networks (WPANs) Described.....	10-5
Wireless Metropolitan-Area Networks (WMANs) Described	10-6
Brief Wireless Network Technology Overview	10-9
Wireless LAN Systems and Markets	10-10
Leading WLAN Equipment Suppliers.....	10-13
IEEE 802.11 (Wi-Fi).....	10-14
Wireless PAN Systems and Markets	10-20
Bluetooth.....	10-20
Ultra Wideband.....	10-27
ZigBee.....	10-28
Z-Wave	10-31
Infrared Communication.....	10-32

TABLE OF CONTENTS

Wireless Network IC Trends.....	10-34
IC Technology and Integration Trends.....	10-34
Wireless Network IC Market and Suppliers.....	10-36
Section 11. Applications to Watch.....	11-1
Introduction.....	11-1
Near-Term Market Impact: 1-5 Years.....	11-1
Wireless Energy Transfer.....	11-1
Cloud Computing.....	11-4
Sub-\$100 Laptop PCs for Developing Countries.....	11-8
Solid-State Drives.....	11-12
E-Passports and Government IDs.....	11-15
Digital Video Surveillance Networks.....	11-16
Femtocell Basestations.....	11-17
Software-Defined Radios.....	11-20
Multi-Format Video Transcoders.....	11-23
Long-Term Market Impact: 5-10 Years.....	11-24
Wireless Sensor Networks.....	11-24
Energy Harvesting.....	11-27
Microfluidic “Lab-on-Chips”.....	11-29
Autonomous (Unmanned) Vehicles.....	11-31
